TAKUMIZIMA:
THE PURSUIT OF
PERFECTION

Advanced Hardware Platform
Leading R & D Capabilities.

achieving excellence in anything is a journey, a constant pursuit of perfection. For TAKUMIZIMA and the great craftsmen we employ, this journey has led to our company being recognized as one of the finest makers of faucets any-where in the world

ARCHITECTS & INTERIOR DESIGNERS

Each project, large or small, requires the same attention to detail both technically and aesthetically, because living comfortably the spaces is the first step toward wellness. That's why we offer many services to designers, by being always ready to listen attentively to the future.

- Yachts
- Residential
- Commercial
- Wellness & Spa
- Self Apartments and Houses
- Hotel and Suite Rooms

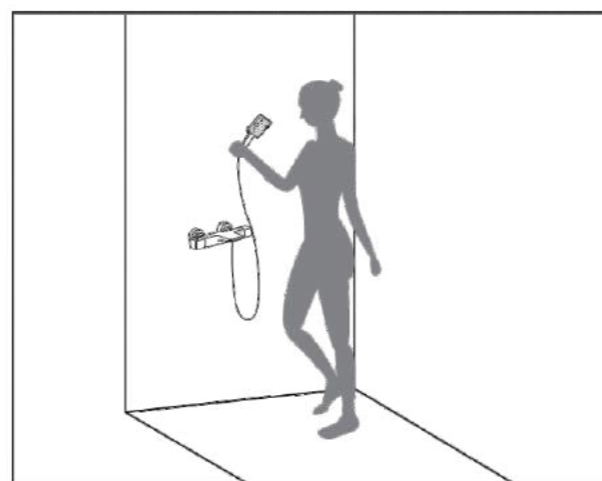

CUSTOMIZED SHOWER SYSTEM

Shower Solution for maximum of relaxation and comfort.

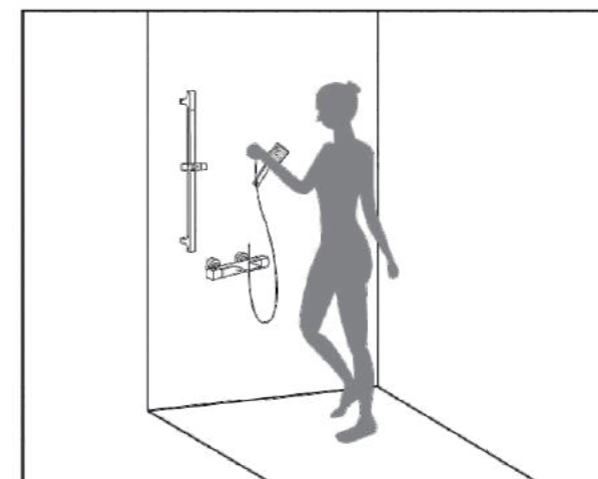

Hand shower or shower set

The basic solution is easy to install and gives you an indulgent shower experience.

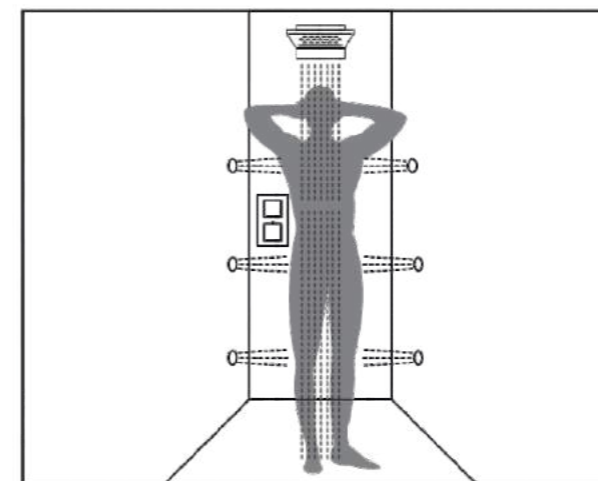

CoolContact: safe and indulgent showering

The CoolContact cooling technology stops the thermostatic mixer's housing getting too hot. It also means there is no more risk of children burning their delicate hands.

Exposed thermostatic mixers

Exposed solution by Takumizima can be installed with little effort to add a technical and visual enhancement to bathrooms

Shower family

The concealed solution for customized shower design. From the waterfall to the all-round Indulgence of side showers.

Exposed and concealed installation solutions

Various spray modes for hand and overhead showers make showering even more enjoyable

Pressure balance showers

A Pressure Balance shower elevates simplicity above all else. A single handle turns the water on and off while delivering the desired temperature.

Exposed thermostatic showers

The all-in-one system with overhead shower, hand shower and thermostatic mixer. The perfect solution for simple bathroom renovation.

TAKUMIZIMA-THE LEADER OF THERMOSTATIC MIXERS

Takumizima thermostatic shower mixers have a built-in thermostat which control the temperature of water, this means that the water temperature is unaffected by other factors, such as a washing machine or someone flushing a toilet.

Prevent Water Channeling

Integrated non-return valves and filters

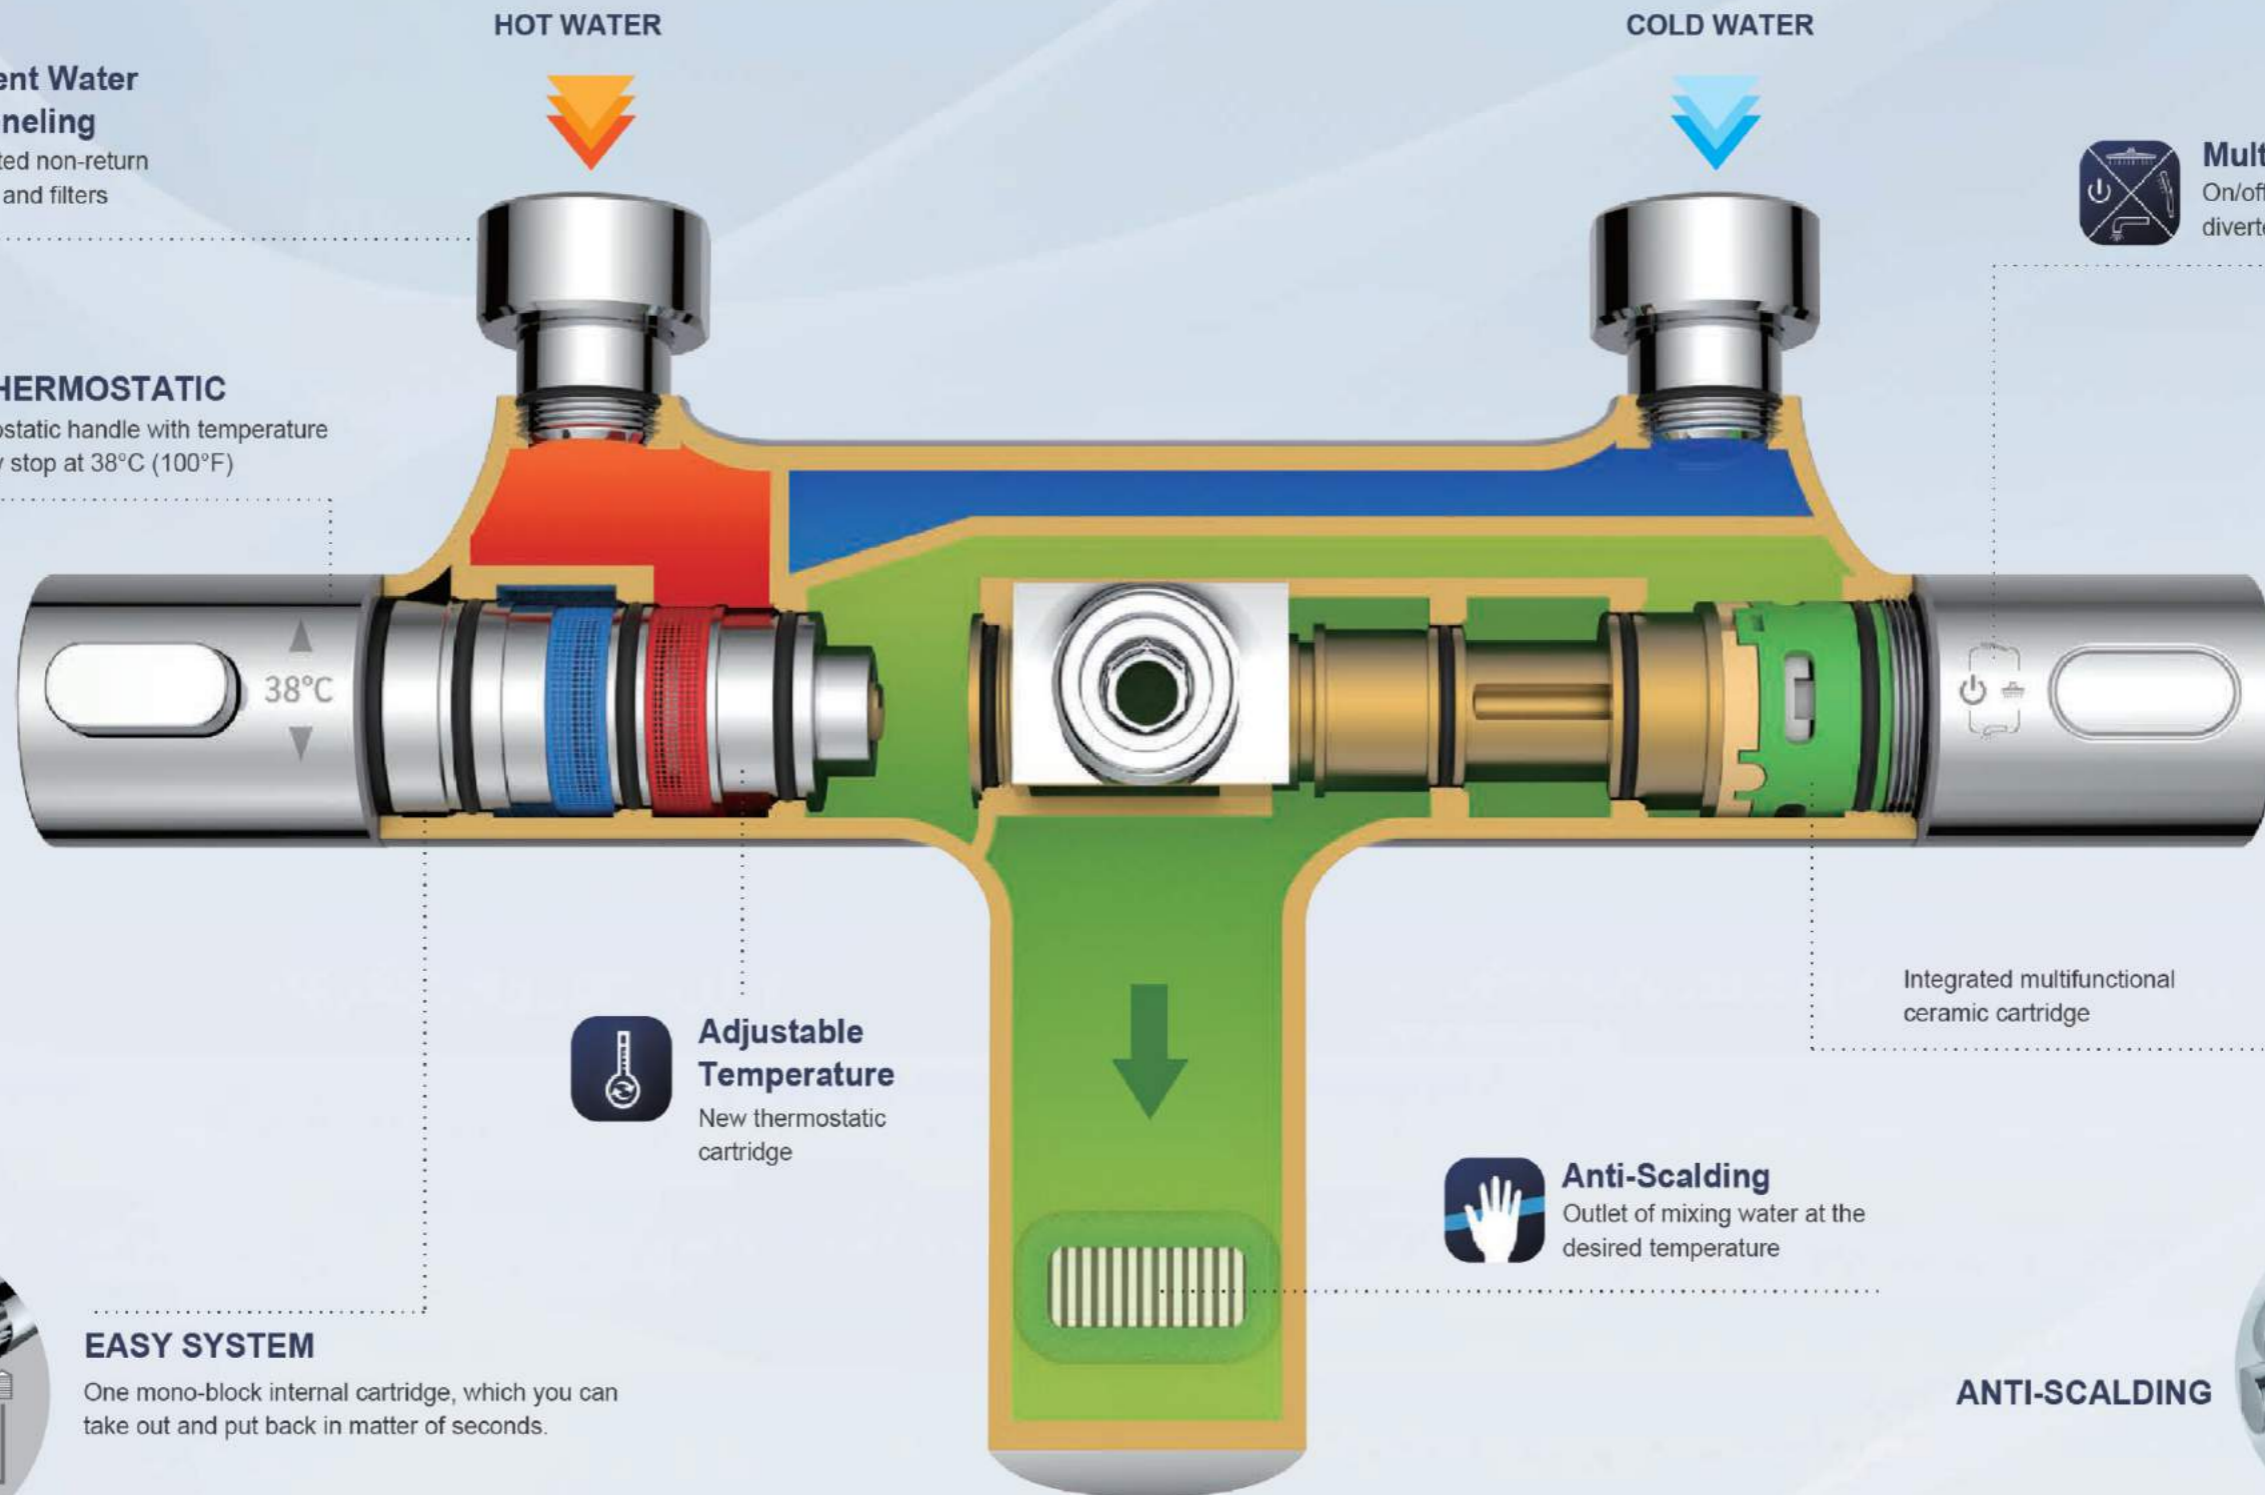

38° THERMOSTATIC

Thermostatic handle with temperature security stop at 38°C (100°F)

Multifunction knob

On/off water control with diverter

Adjustable Temperature

New thermostatic cartridge

Anti-Scalding

Outlet of mixing water at the desired temperature

Integrated multifunctional ceramic cartridge

EASY SYSTEM

One mono-block internal cartridge, which you can take out and put back in matter of seconds.

ANTI-SCALDING

WALL-MOUNTED THERMOSTATIC TECHNOLOGY

Easy installation thanks to its protective casing with depth indicator

Consider humanization design from all aspects, adjust different water outlets according to your personal preferences and habits, experience the best shower effect.

Thermostatic shower mixing valve can blends hot water with cold water to ensure the safety 38°C (100°F) constant temperatures, preventing scalding, especially for children, the elderly and pregnant women.

Dense rain technology, which brings you to experience the natural SPA when you taking a shower.

High-efficient jet and water saving AIRmix is the new technology available on hand showers and shower heads, mixing the water with air. It allows water saving up to 9LPM (liter per minute), while giving the feeling of a generous jet.

- Mixed water
- Hot water
- Cold water

PVC Box

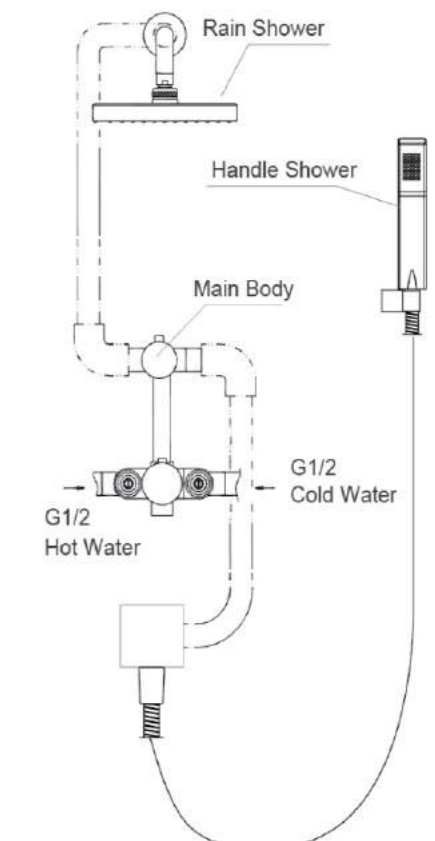

Mat Black Plating Cover Board

TAKUMIZIMA new built-in system makes was installaiton of the thermostatic mixer easier even before tiling or plaster works and allows for the adjustment of the adjustment of the valve in the right position and guides for required depth of the wall recess. A safe system that protects the mixer from debris and gives easy access for the maintenance and replacement of the cartridges and filters

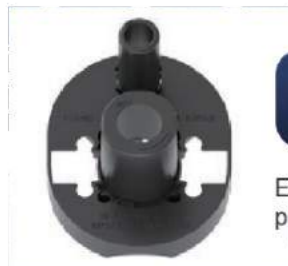

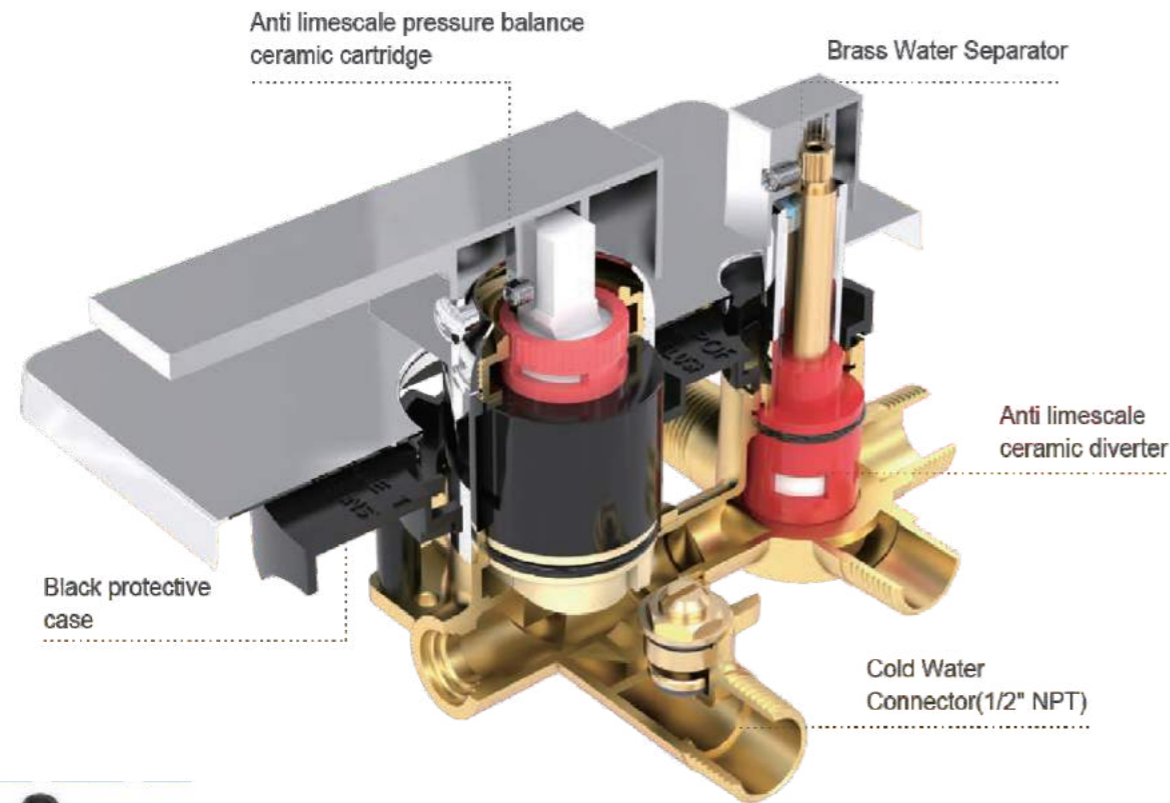

Technical Reference

Operating pressure	0.05 Mpa - 0.8Mpa
Recommended pressure	0.1 Mpa - 0.5 Mpa
Cold water temperature	4°C - 29°C
Hot water temperature	50°C - 80°C
Temperature range	20°C - 49°C
Security stop	38°C
Cold water supply failure test	Within 5 seconds after cold water supply fails, outflow rate automatically drops to 1.9L/Min, outflow quantity: ≤ 150ml.
Life test	CSA B125-98 ASSE1016 (≤100,000 cycles)
Outflow temperature Auto-aligning sensitivity	When inlet water temperature or pressure varies, outlet water temperature change will be less than ±2°C
Standard Apply	CSA B125-98 ASSE 1016 EN1111 AS-4032.1

Installation Guide

PRESSURE BALANCE VALVE

Easy installation thanks to its protective casing with depth indicator.

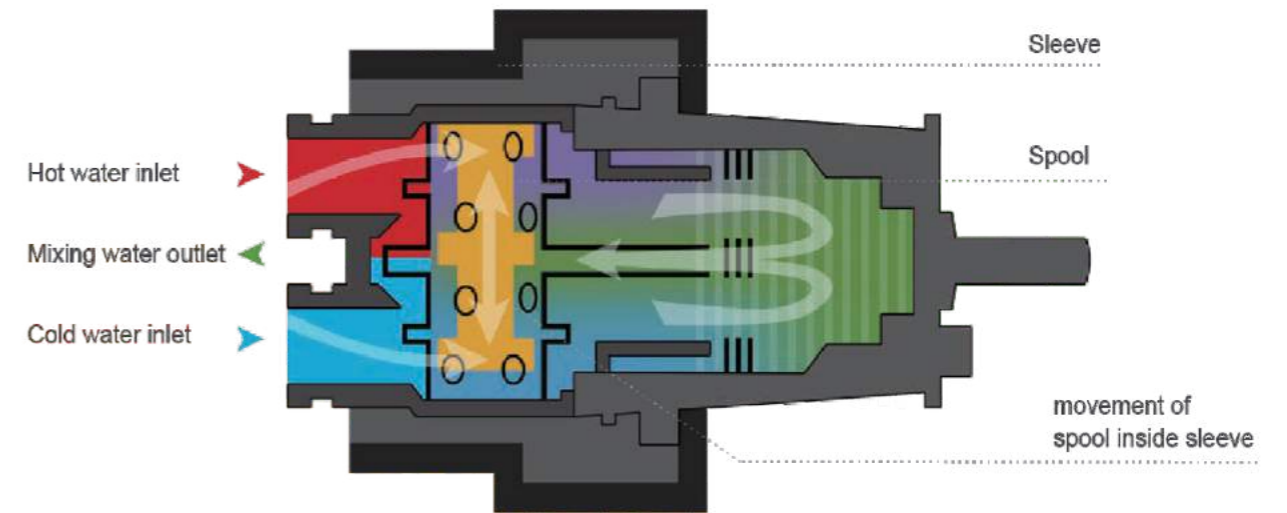

LEGIONELLA BACTERIA

131°F

Legionella bacteria (responsible for Legionnaire's Disease, a type of pneumonia) apparently love water heaters, and can proliferate at temperatures up to 120°F - exactly where many energy-conscious folks recommend setting the thermostat. For these and other bacteria, the game's over around 140°F. Since temperatures within the tank are stratified, there's a good chance that if Legionella were introduced, they would thrive in a tank set at 120°F; at 140°F, this is unlikely.

TAKUMIZIMA PRESSURE BALANCE VALVES

Monitors water pressure to balance temperature react to the pressure of hot or cold water and adjust the outflow of hot/cold water source, to ensure the water doesn't suddenly get colder or hotter when it comes out of the shower nozzle.

Function

TAKUMIZIMA wall-mount pressure balance shower system has 1 to 3 functions to choose, which fits all your requirements and brings you a different luxury and unique shower experience

LUXURIOUS THERMOSTATIC MIXERS COLLECTIONS

CONCEALED SOLUTIONS FOR MAXIMUM EASE AND PRECISION.

We only consider a faucet to be perfect when it fits perfectly. When every angle, every edge, every surface and every distance is correct to the very last millimeter. Especially when it comes to concealed installations. Because here, functionality and a flawless finish are equally important.
